

## McKinnon Materials, Inc.

### THE CHOICE IS CRYSTAL CLEAR

Crystal Coat has the inherent ability to deeply enhance the color intensity of pavers while providing a fortified, protective shield. Its strength and durability as to wear/abrasion resistance, will substantially decrease routine cleaning and maintenance costs while forming a penetrating, locked in place bond, as compared to lesser generic alternatives.

Specifically formulated, by McKinnon Materials; it withstands the harsh forces of Mother Nature and continuous UV rays of the sun. This product is durable and long lasting and offers a high quality, inexpensive paver solution! Given that it is highly concentrated, it is meant to be extended through the addition of 50% water. Why pay extra for water?

Protect investments made in pavers with Crystal Coat today and relax and enjoy the savings and curb appeal for years to come.

**Product Description:** Single Component, 100% cross-linking acrylic sealer 30-32% solids

#### Characteristics:

Flexibility- Allows expansion /contraction of pavers to take place without thermoshock demise.

Resistance- Weathering and UV stability.

Durability- Abrasion resistant, deep penetrating into the paver, forming an unyielding bond.

**Maintenance-** Strength and durability substantially decrease need for frequent cleaning and maintenance.

**Coverage:** 150-300 Sq. ft.

**Recommended:** Residential or Commercial, interior or exterior service; decks, driveways, patios, pavers and all deck coat overlays.
