

Chromastain™

Instructions for use:

1. Chromastain™ is formulated to be user friendly. It is designed to be used full strength straight out of the bottle, or if you wish to lighten the stain color you can use the bottle marked “reducer” to do so. You can also achieve other colors by combining any of the colors.
2. Application Method:
(You can use any of the following methods):
 - a. Use the included sprayer to spray the color, or a pump up sprayer, or any other type of spray equipment.
 - b. Sponge to place the stain
 - c. Rag the color on
 - d. Brush or roller can be used to apply color
3. Using on a full-scale job:
 - a. McKinnon Materials’ preferred application is done with a pump up sprayer; simply load the sprayer with the lightest color that you are going to be using, such as yellow, and then take the sprayer and either solid coat the surface with it or just spray spots all over. Then take the next color such as red and do the same. After this, lightly spray the entire surface with brown. [colors mentioned are only an example]
 - b. Wrapping up your job: After the stain is dry, it is required that you put on 2 coats of sealer. This can be either water- or solvent-based depending on your requirements or preference.
